

## LLC Beta Plus Fertility

### Quality Management System Policy

Date: May 1, 2025

Version: 2

#### Quality Management Mission

---

The quality management system serves as the core of the management area for LLC Beta Plus Fertility. It aims to ensure that the organization's business processes comply with ISO 9001 requirements and promote continuous improvement.

#### Quality Management Goals

---

- To create a motivated quality management system based on process-oriented approaches;
- To ensure the continuous improvement of the management system;
- To increase work efficiency by reducing duplicated and inconsistent processes, supported by management documentation flow.
- To improve the quality of products and services by continuously verifying product characteristics and compliance with established requirements, managing processes, and ensuring compliance with standards and legislation in the work cycle.
- We acknowledge our responsibility to the environment and are committed to minimizing our environmental impact across all stages of our operations.

#### Quality Management Principles

---

- Adherence to professional standards;
- Increasing customer satisfaction;
- Preventing inconsistencies in service delivery and product production processes;
- Creating conditions for professional growth and development of employees;
- Increasing responsibility for the quality of work within the competence of each employee;
- Involving personnel in quality management;
- Continuously improving the effectiveness of the quality management system;
- Regular quality control of products and activities;
- Regular analysis and revision of the policy provisions.
- Comply with environmental requirements and reduce the environmental impact of our activities
- Use natural and material resources efficiently; promote energy efficiency, waste reduction, and recycling.
